cataloguing parks and
gardens*

Cataloguing cultural heritage

WHAT IS CATALOGUING

consists in the classification, description and registration of a cultural heritage.

WHO CATALOG

superintendences, public entities, diocese, etc.

WHAT TO CATALOG

the cultural heritage

HOW TO CATALOG

according to defined standards (homogeneous criteria)ri omogenei)

WHY CATALOG

to know the cultural heritage for the purpose of protection and enhancement

Cataloging is to systematically collect data and news about the cultural heritage that is a classification, description, registration of a cultural asset.

CATALOGUE ≠ INVENTORY

INVENTORY: listing objects or documents (registry)

CATALOGUE: ordered numbering of multiple objects

The discriminant is the ORDER that can be topographic, chronological, typological, etc.

The cataloging activity consists in planning and organizing ways to:

- Locate the heritage
- Recognize the heritage
 - ✓ In its physical value
 - ✓ In its historical value (past and current).
- Gather knowledge on the heritage
- Transcribe the information collected by general priority criteria into a norm (catalog norm)

L. 1089/1939

OBJECT: things of historical interest

INTENT: preservation of things of historical interest with attention to restriction regime

Hague Convention of 1954

OBJECT: cultural heritage

INTENT Protection of Cultural Property in the Event of Armed Conflict

Dlgs. 42/2004

Codice dei Beni Culturali e del Paesaggio

OBJECT: : cultural heritage

INTENT : preservation, use and promotion of cultural heritage

The subject of cataloging is the cultural heritage that over the years has had different terminologies and meanings. At the beginning there was talk of “things of historical interest”, with attention to restriction regime, then move on to "cultural heritage”.

The cultural heritage in its modern meaning encloses an immaterial value for what it represents, because it is the historical testimony of human activity and its creativity: through the cultural heritage, one identifies and qualifies the peculiarities of a nation

The cultural heritage has to be:

- preserved
- protected
- managed
- benefited

the tool to preserve and manage is the CATALOG which is thus defined as a
CULTURAL FACT-FINDING OPERATION
indispensable for every asset protection act

D. Lgs. 22 gennaio 2004, n. 42

CODICE DEI BENI CULTURALI E DEL PAESAGGIO,

ai sensi dell'art. 10 della legge 6 luglio 2002, n.137

così come modificato dal D. Lgs. 24 marzo 2006, n. 156 e D. Lgs. 24 marzo 2006, n. 157
nonché dal D. Lgs. 26 marzo 2008, n. 62 e D. Lgs. 26 marzo 2008, n. 63

Articolo 17. (Catalogazione)

- 1. Il Ministero, con il concorso delle regioni e degli altri enti pubblici territoriali, assicura la catalogazione dei beni culturali e coordina le relative attività*
- 2. Le procedure e le modalità di catalogazione sono stabilite con decreto ministeriale. A tal fine il Ministero, con il concorso delle regioni, individua e definisce metodologie comuni di raccolta, scambio, accesso ed elaborazione dei dati a livello nazionale e di integrazione in rete delle banche dati dello Stato, delle regioni e degli altri enti pubblici territoriali.*
- 3. Il Ministero e le regioni, anche con la collaborazione delle università, concorrono alla definizione di programmi concernenti studi, ricerche ed iniziative scientifiche in tema di metodologie di catalogazione e inventariazione.*
- 4. Il Ministero, le regioni e gli altri enti pubblici territoriali, con le modalità di cui al decreto ministeriale previsto al comma 2, curano la catalogazione dei beni culturali loro appartenenti e, previa intese con gli enti proprietari, degli altri beni culturali.*
- 5. I dati di cui al presente Articolo affluiscono al catalogo nazionale dei beni culturali in ogni sua articolazione.*
- 6. La consultazione dei dati concernenti le dichiarazioni emesse ai sensi dell'Articolo 13 è disciplinata in modo da garantire la sicurezza dei beni e la tutela della riservatezza*

On the **Codice dei beni culturali e del paesaggio** (D. Lgs. 42/2004 e s.m.i. - art. 17) cataloguing is inserted significantly at the beginning of TITLE I dedicated to protection, as a fact-finding stage indispensable for the proper management and preservation of cultural heritage.

Cataloguing is an indispensable tool for getting the proper knowledge of cultural heritage and laying the foundation for safeguarding the heritage and for conservative interventions.

Cataloguing is a PUBLIC SERVICE

In addition to the position, legal status, it is crucial to record all those physical, material and historical-cultural and artistic characters that characterize the object by connotating it as a cultural heritage.

The cataloguing has in fact overcome the initial motivations of a binding nature and thus becomes an activity capable of restoring the complexity of cultural heritage and transferring its values and meanings as well as preserving them.

In short:

A catalog card must have a dual function:

- **to report the reality of the heritage in question;**
- **have all the information to promote and guide, even if in advance, any conservation act.**

In order to gather in synthetic norm and order all useful information about the cultural property, various types of catalog norms are continuously processed by MIBACT, depending on the different types of heritages.

ARCHITETTONICO E PAESAGGISTICO

ARCHEOLOGICO

STORICO ARTISTICO

ETNOANTROPOLOGICO

The ICCD standards for cataloguing of properties follow the same organisational structure:

- Architectural and landscape
- Archaeological
- Historic-artistic
- Ethno-anthropological

MIBACT AREAS OF HERITAGE MANAGEMENT

Archaeological
Architectural and landscape
 Ethno-anthropological
 Historic-artistic

CATEGORIES

Movable properties

DISCIPLINARY SECTORS

Archeological heritage
Architectural and landscape heritage
 Demo-ethno-anthropological heritage
 Photographic heritage
 Music heritage
 Natural heritage
 Numismatic heritage
 Scientific and technological heritage
 Historic and artistic properties

TYPES (N. 30)

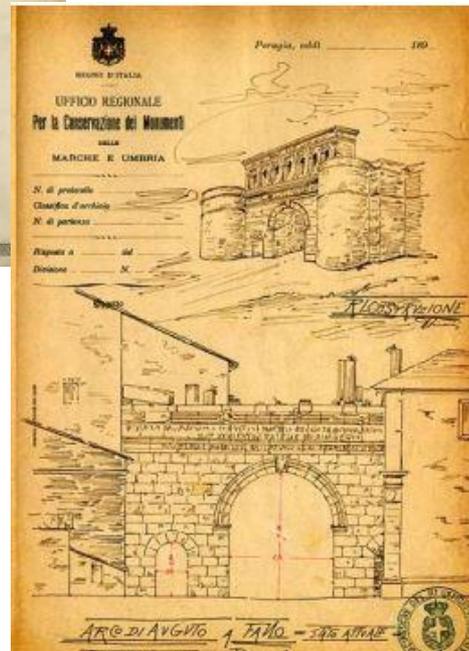

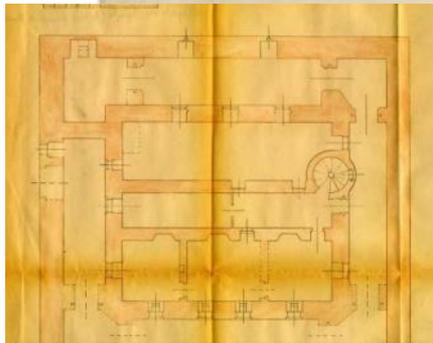

A Architecture
 AT Anthropological materials,
 BDI Intangible demo-ethno-anthropological heritage
 ...
PG Parks and Gardens

 Etc.

As of today the state of the tools available for cataloguing the architectural and landscape heritage is articulated as follows

- **A norm** to catalog ARCHITECTURES
- **PG norm** to catalog PARKS and GARDENS.

*There is also on the paper norms **the SU** norm for cataloging the Urban Sectors; currently in SIGECweb is a still unpublished regulation.*

The rules for the cataloging of architectural and landscaping heritages, as defined today, is the result of many years of studies and elaborations as well as of a long cataloging experience, which has been taking place in Italy **since the end of the nineteenth century.**

The first catalog norms for the collection of monuments and works of archaeological and artistic interest were originally only for paper version and had a substantially "descriptive" approach.

The SIGECweb catalog norm collects information in a structured way on the heritage by «guiding» the cataloger by compiling various information sections called **paragraphs**, dedicated to topics such as history, location, and so on.

Each paragraph is composed by **fields** and/or **sub-fields**.

Some paragraphs are repetitive.

As for the other catalog record, on the records A and PG are registered and organized:

- **administrative information**
on the norm resource

- **descriptive and technical scientific information**
which points out the value of the heritage
 - **geographical information**
which locates the heritage on the territory

- **information on the documentation of the set**
related to the cataloged cultural heritage

Each norm contains **mandatory** items, whose compilation is considered essential for knowledge of the heritage. Other elements, however, are **optional** and are compiled at the discretion of the scholar or at the specific request of the institution, depending on the different situations to be documented.

I - INVENTORY level

Only mandatory items are compiled

P – PRECATALOG level

C – CATALOG level

depending on the degree of depth of the research, if the optional elements are also compiled

The tab is divided into paragraphs :

- Some paragraphs are common to other norms
- Other paragraphs are specific to the description of the architecture.

The description of the architectural heritage is organized on the basis of the :

- **unit** (areas)
- **functional partitions** (walls, roofs, floors, etc.)

located in the monument

Chronological repertoire of all the news (both of a general character and of a specific character) pertinent to the cataloged heritage. Each report can be referred to an extended time period or to a single date.

The whole paragraph is repetitive, as it must be compiled as a whole for each news item.

It is mandatory to use this paragraph at least once, with reference to the origin of the building or to the predominant stage of construction.

OSS - Osservazioni

Per l'edificio di cui faceva parte la loggia, andato distrutto nella seconda guerra mondiale e ricostruito integralmente nel 1957, è proposto il decaduto interesse. Il vincolo rinnovato nel 2009 riguarda i "resti di loggia del secolo XIII" costituiti da due archi di pietra sorretti da una colonna in granito di epoca romana con capitello romanico.

In this paragraph, additional news may be recorded on the well-cataloged, free text that relates to information that could not be included in specific track plot fields.

Some sections of the catalogue record PG are common to the record A and the paragraphs are linked to:

- **administrative information** on the norm resource
- **geographical information** which relates the heritage and the territory
- **information on the accompanying documentation** related to the catalogued heritage

The specific paragraphs of the PG norm are specific to the **descriptive and technical information** of the parks and gardens.

UT				URBAN-TERRITORIAL PLANNING SYSTEM					
	RAM			Environmental relations	1000				1

UT - SISTEMA URBANISTICO TERRITORIALE

RAM - Correlazioni ambientali

Il parco della rimembranza si colloca nel centro storico del Comune di Piovà Massaia, e si sviluppa su due piazze a diversa quota altimetrica, collegate da una via: in Piazza Guglielmo Marconi, di fronte al Municipio, è presente un'area verde circondata da una siepe, che comprende al suo interno un monumento a lapide, due lapidi intitolate alla Prima e alla Seconda Guerra Mondiale, un alzabandiera e due cannoni. All'angolo con Via Don Borio, è presente, sulla sinistra, una targa che reca la scritta "parco rimembranza". Lungo il viale è presente una serie di 20 alberi su cui sono apposte altrettante targhe intitolate ai caduti della Prima e della Seconda Guerra Mondiale. La via conduce in Piazza Don Borio: il lato est della piazza è delimitato dalla Chiesa parrocchiale intitolata ai Santi Pietro e Giorgio, mentre sugli altri tre lati sono presenti 21 alberi, su cui sono apposte altrettante targhe intitolate ai caduti della Prima Guerra Mondiale.

This paragraph contains information that can provide a descriptive picture of the environmental (urban or extra-urban) context within which the heritage concerned is inserted.

E.g. in urban context, specify if it borders on buildings or if it is surrounded by public and / or private streets and public spaces.

DESCRIZIONE.

Situato in prossimità del Palazzo Orsini al di là della via del Lavato, il giardino è circondato per tre lati (nord, est e sud) da un alto muro e sul restante lato dal fondo delle abitazioni situate intorno al palazzo Orsini - Terrisi, poi Piccinardi.

Sul muro, lungo la via del Lavato, si aprono, ad ovest, due finestre alla francese con inferriate e un portale (con portone in legno) in asse con quella del frontistato palazzo Orsini. Da questo portone si accede all'interno del giardino, dal lato nord due aperture ad arco in laterizio con inferriate, aprono verso la strada lo spazio del giardino. Uno è di forma semplice, pensicola rettangolare con aiuola delimitata da vasetti con diottoloni a "pillole di Pise"; i vasetti girano intorno al perimetro murato e convergono poi verso il portale situato fuori asse e demarca rispetto all'ingresso. Nella aiuola, a prato rasato, sono poste alcune conche con fiori di stagione.

Alcuni alberi di alto fusto - in particolare sono da notare alcuni bella mogolia - particolarmente con varie forme e colori, a seconda della stagione, lo spazio ninoretto e contenuto del giardino.

Sul fondo est sono stati piantati degli arbusti di lauro a "nascondere" alcune irregolarità e incertezze architettoniche del retro prospetto degli edifici che vi sorgono. Lungo il resto del perimetro murato si sviluppano, avvolgendosi e sostenuti in ferro, dei rampicanti che sbordano, oltre il muro, nella strada.
